COMMON-RAIL DIESEL INJECTION PARTS

2019 Overseas Edition

NOW, LIWEI HAS BEEN THE BEST MANUFACTURER OF COMMON-RAIL NOZZLE IN CHINA

ALWAYS DEDICATED TO PROVIDE ALL TYPES TOP QUALITY COMMON-RAIL NOZZLES & PARTS

TO CUSTOMERS ALL OVER THE WORLD

AND OFFER HIGH QUALITY TECHNOLOGY & SERVICE SUPPORT

▶ LIWEI FUEL INJECTION CO., LTD. >>>

Zhejiang Liwei Fuel injection Co, Ltd ----Former Zhejiang Fuel injection Co, Ltd., was founded in 1967, located in Shuige industrial park of lishui city, zhejiang province, concentrated in diesel fuel injection R&D, manufacturing, sales, as a national hi-tech enterprise, who already becomes the leader in the production of high pressure common rail injection parts in China.

LIWEI has a strong R&D capabilities, rich experience for diesel fuel system, in 1988. we design and produce DF 8 series for China ministry of railways locomotive fuel injector, fuel pump by our own, granted ministry of science and technology progress award and the national science and technology progress award honorary titles, the system is still in use today.

In 2008, LIWEI started to involve into the R&D project of high pressure common rail injection system, using the world first-class production technology, the world top cutting edge manufacturing and testing technology, comprehensive production with higher standard than European emission standard for high pressure common rail injection parts. In combination with more than 50 years production experience of LIWEI pump, nozzle, and the diesel engine, high pressure common rail system, and the knowledge of the market, LIWEI has been able to provide consistent, in line with international standards of original factory parts. After few years used and tested by global users, LIWEI has become the China most outstanding high pressure common rail injection parts manufacturer and supplier.

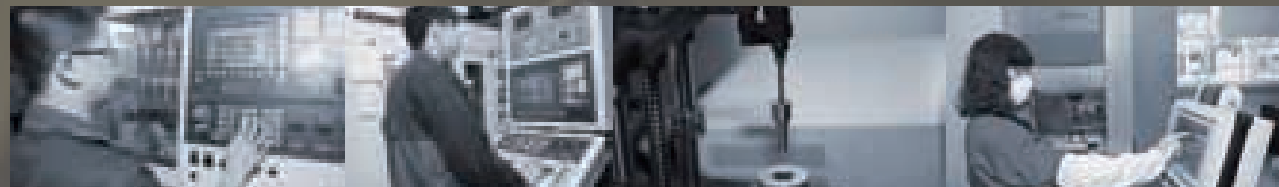

Nowadays, diesel technology brisks up than any period before. New high pressure injection system used in the commercial motor vehicle can reduce diesel engine fuel, be more efficient, and this is beneficial for diesel vehicle. In the long term, the prosperity of the diesel engine will extend from the current Europe to other parts of the world.

After adopting these cutting-edge technologies, which also means making more requirements on those experts who are manufacturing diesel parts. LIWEI as a climber, always upward. Comply with European high emission standards of common rail nozzle, which can fill the domestic blank. LIWEI believes that challenge without limits, professional is endless.

At your point, Liwei spare no efforts to help you reduce your maintenance cost and provide common-rail nozzle compatible with original standard. LIWEI will always persuit high quality forever !

Skillful in Craftsmanship & Ingenuity

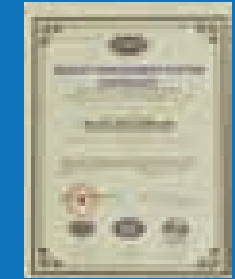

ZHEJIANG LIWEI FUEL INJECTION CO., LTD.

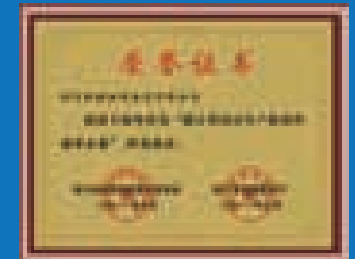

COMMON RAIL SYSTEM INJECTION PARTS MANUFACTURER

LIWEI CERTIFICATE

LIWEI adheres to the high-technology, high-performance, high-quality, LIWEI believes that with its established brand reputation in the field and strong innovation ability, will provide global customers with reliable products and quality service !

QUALITY MANAGEMENT SYSTEM-ISO 9001:2008

Provincial Cleaner Production Enterprises

Fuel pump and nozzle technology R&D center

Key Hi-Tech enterprise of China

LIWEI' S STRENGTH

Power Source

Technological Innovation

▶ R&D STRENGTH >>>

◆ Strong team of engineers

Liwei has more than 50 senior technical R&D personnel, more than 10 external experts and technical advisory teams. Many of them have worked in large and medium-sized enterprises and scientific research units. They have rich professional and technical work experience and high-quality equipment adjustment ability. This is a research-oriented and application-oriented innovative team.

◆ Advanced manufacturing and core testing equipment

Replacing the traditional processing equipment with international advanced equipment is one of the driving forces of Liwei's rapid growth. Liwei nozzle production is composed of the world's top professional equipment, including German medium hole seat grinder, Swiss EDM four-position EDM machine tool, American extrusion grinder, Italian high-precision coreless grinder, German needle valve angle grinder, American processing center, etc. The processing accuracy reaches 2 mm, high-precision processing. The process ensures that the fuel flow rate of the fuel injector is below 2%.

◆ Fastest development speed

Liwei has a strong team of engineers, equipped with comprehensive production and testing equipment, so that we can provide customers with the fastest development speed.

▶ PRODUCTION MANAGEMENT >>>

1, The core equipment consists of the world's top equipment, product consistency is guaranteed.

2, LIWEI is developing, utilizing and optimizing its manufacturing, procurement and engineering design capabilities to the global level.

3, Rapid and flexible product development and implementation of lean production process from raw materials to finished products.

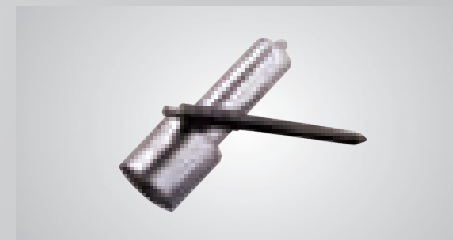

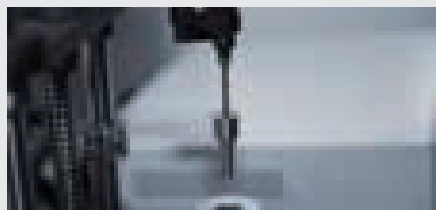

▶ QUALITY MANAGEMENT >>>

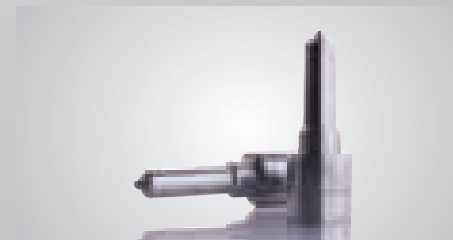

Quality is the lifeline of Liwei's development. Liwei has made unremitting efforts to construct quality management system engineering, established perfect quality assurance system, enterprise standard parts system, measurement and testing system, and institutionalized, standardized and programmed all aspects of quality management. Surpass customer expectation and create excellent quality.

▶ Customer value >>>

Liwei aims to create more value for customers. Our engineering and manufacturing teams are constantly communicating with customers to align their concerns with their technology development roadmap. Liwei's unique strategy combines technology leadership, global business expansion and excellence in execution. Let us always focus on providing customers with products, services and solutions that meet their needs and meet their values, so as to better respond to the needs of the growing global market in the industry.

- The reliability tests meet the criteria: GB/T5772-2010, GB17691-2005 and JB/T51184-2000.
- Performance tests meet the standards: EPS200, EPS708 and EPS815 test bench.
- It can meet the requirements of BOS and DSO high pressure common rail.
- Accurate control of fuel injection can reduce engine emissions and fuel consumption.
- The traffic fluctuation rate is below 2%.
- The flow coefficient of nozzle coupling is greater than 0.8.
- Working pressure (bar) is more than 1400, which can meet Euro III and Euro IV emission standards.
- The parts have high machining accuracy and long service life.

- Core technology and quality: The design and manufacture adopt the advanced technology standard in the world, and inherit the high precision and high quality technology tradition in European manufacturing field.
- Low emission: With precise injection angle, super penetration ability and high atomization degree, the exhaust emission of diesel engine is greatly reduced. By reducing the harmful volume of the nozzle, the residual fuel and carbon deposit on the nozzle head are reduced, and the fuel consumption and emission performance of diesel engine are greatly improved.
- High-tech coating technology application: Common rail oil nozzle needle valve coating keeps close cooperation with the world's top coating suppliers to ensure the high quality and durability of oil nozzles and make their service life longer.

The hi-tech functionality and performance is supported by precise and sophisticated manufacturing.
