HC-CARGO | Off-highway Applications

Construction Vehicles

The construction industry is a strong sector with growth expected over the next decade. Market demand for construction machinery is on the rise, with estimates showing an increase of 7-8%. This growth is fueled by increased activity in residential, infrastructure, and commercial construction projects. Favorable economic conditions with low interest rates are also contributing to this positive trend.

Agricultural Machinery

The agricultural machinery market is experiencing growth, particularly in tractors under 50HP. However, the market varies significantly from region to region. This is why we are committed to product development to meet market demands and offer a relevant product portfolio.

Forklifts & Material Handling

Are your customers tired of costly downtime from forklift breakdowns? From palletisers to heavy-duty forklifts, we supply units to keep warehouse logistics running. Our range of starter and generator units are designed to ensure reliability and minimize downtime in busy warehouse environments. When machines are running optimally, your customers can focus on what really counts: keeping goods moving.

The offer → High Quality Units

Our HC-CARGO program offers a wide range of starters and alternators for off-highway vehicles. We expand our portfolio with new units and applications for existing parts continuously.

Industrial applications

We provide a comprehensive coverage for repair needs. With over 400 units covering more than 3000 applications. You can find the right products using OE numbers. Our units are also available on TecDoc and include applications for bulldozers, excavators, dumpers, road rollers and other digger machinery from: Komatsu, John Deere, Caterpillar, Bobcat, JCB, Yanmar, Manitou a.o.

Agricultural vehicles

Our HC-CARGO program offers a wide range of starters and alternators and excellent coverage for the European vehicle population. We've expanded our portfolio with new units and applications for existing parts. This includes applications for leading brands like John Deere, Ford, Massey Ferguson, Fendt, New Holland, Case IH, Deutz-Fahr, Valmet, and Valtra.

Material handling

The HC-CARGO Program contains a selected range of products for forklifts, stackers, access applications etc. 150+ starters and alternators covering more than 650 applications for forklifts from Mitsubishi, NISSAN, Caterpillar, Toyota Clark, KOMATSU, Yale Manitou, TCM LINDE, Case JCB a.o.

- Find the right parts for off-highway vehicles with our HC-CARGO program.
- Our units, including spare parts, are available on TecDoc.
